

# ABS SEMINAR

## INNOVATIVE SOLUTIONS FOR SHIPPING

15 May 2018

National University "Odessa Maritime Academy" | 8, Didrikhson str | 65029 Odessa | Ukraine

You are cordially invited to attend an ABS seminar on Innovative Solutions for Shipping being held on the 15 May 2018.

After a short presentation on the ABS Global Ship Systems Center, ABS will present on ABS Advanced Solutions.

The current state of maritime has given rise to new challenges that need innovative solutions. The ABS Advanced Solutions team is addressing these challenges with innovative cybersecurity, enterprise asset management, and advanced engineering solutions. Utilizing deep technical knowledge gained over 150 years of class certification ABS has created a maritime specific method for calculating cyber risk using the FCI model and a solution for optimizing your maintenance program that spans the entire asset lifecycle. This translates to more agile, reliable and ultimately safer ways of attaining operational excellence.

Complete with notable examples of client success stories ABS Advanced Solutions will share how ABS is leading the future of maritime.

This is an invitation-only event and attendance is free.

Complimentary refreshments and lunch will be provided.

To reserve your place, you can:
